
List of figures

Figure 1	
Line cards in the Meridian 1 architecture	5
Figure 2	
IPE line cards shown installed in an NT8D11 CE/PE Module	11
Figure 3	
IPE line cards shown installed in an NT8D37 IPE Module	12
Figure 4	
PE line cards shown installed in an NT8D13 PE Module	13
Figure 5	
Network connections to PE/IPE modules	17
Figure 6	
Typical IPE analog line card architecture	18
Figure 7	
DS-30X loop data format	21
Figure 8	
Typical PE line card architecture	24
Figure 9	
SL-1 Network loop data format	27
Figure 10	
Typical analog line interface unit block diagram	29
Figure 11	
Digital line interface unit block diagram	32
Figure 12	
Call connection sequence—near-end station receiving call	35

Figure 13	
Call connection sequence—near-end originating call	36
Figure 14	
Battery reversal answer and disconnect supervision sequence	38
Figure 15	
Hook flash disconnect supervision sequence	39
Figure 16	
OPS analog line card—faceplate	55
Figure 17	
OPS analog line card—block diagram	56
Figure 18	
OPS analog line card—typical cross connection example	64
Figure 19	
OPS analog line card—jumper block locations	67
Figure 20	
Traditional OPS application configuration	70
Figure 21	
Line-side T1 card—faceplate	77
Figure 22	
Line-side T1 card—block diagram	80
Figure 23	
Line-side T1 card—T1 protocol dip switch locations	88
Figure 24	
Line-side T1 card—connection using the NT5D13AA Line-side T1 Cable 99	
Figure 25	
Line-side T1 card—connecting two or more cards to the MMI	105
Figure 26	
MMI Local loopback test	125
Figure 27	
MMI External loopback test	125

Figure 28	
MMI Network loopback test	126
Figure 29	
Line-side T1 interface connection to peripheral equipment	127
Figure 30	
Line-side T1 interface in off-premise application	128
Figure 31	
Line-side T1 interface connection to Norstar system	129
Figure 32	
Digital line card—faceplate	138
Figure 33	
Digital line card—block diagram	140
Figure 34	
Digital line card—typical cross connection example	147
Figure 35	
Digital line card—jumper block and switch locations.	150
Figure 36	
Analog message waiting line card—faceplate	153
Figure 37	
Analog message waiting line card—block diagram	155
Figure 38	
Analog message waiting line card—typical cross connection example	163
Figure 39	
Analog message waiting line card—jumper block and switch locations	166
Figure 40	
OPX analog line card—faceplate	168
Figure 41	
OPX analog line card—block diagram	169
Figure 42	
OPX analog line card—typical cross connection example	175
Figure 43	
OPX analog line card—jumper block locations	177

Figure 44	
Basic 500/2500 analog line card—faceplate	180
Figure 45	
Basic 500/2500 analog line card—block diagram	181
Figure 46	
Basic 500/2500 analog line card—typical cross connection example .	187
Figure 47	
Basic 500/2500 analog line card—jumper block locations	189
Figure 48	
Integrated services digital line card—faceplate	193
Figure 49	
Integrated services digital line card—block diagram	194
Figure 50	
Integrated services digital line card—typical connection example . . .	200
Figure 51	
Integrated services digital line card—jumper block locations	202
Figure 52	
16-port message waiting analog line card—faceplate	204
Figure 53	
16-port message waiting analog line card—block diagram	205
Figure 54	
16-port message waiting analog line card—typical cross connection example	212
Figure 55	
16-port message waiting analog line card—jumper block locations . .	215
